

2017
Educational
Wooden Toys

We are delighted to introduce our 2017 range providing children around the world with toys that stimulate their imagination, increase their knowledge and enhance their mental and physical development.

We believe that a toy should not only be for playing but it is an important tool in the development of a child's self confidence, intelligence and creativity. Our toys are designed by specialists' who understand child development and how toys can stimulate that development at each stage of a child growth.

We use only the best, natural, high quality materials which include European beech wood and German paints and varnishes. All the different stages in making and packaging our high quality products are carried out in our own factories.

EDUFUN has been expanding lately. We have Subsidiaries companies in Australia and KSA beside Dubai and Egypt. Our products are available in more than 25 countries through our Distributes.

The leap

Edu-Fun celebrated the opening of its showrooms and offices In September 2016 in **Dubai, UAE**. All international and regional export offices, sales and marketing together with our head offices will be moved to the new location with the beginning of year 2017.

Edu-Fun group is restructuring its activities to keep pace with the growing markets to become a leading regional and an international player.

Dubai as an international business and logistics hub was our perfect choice to move our head quarter, international & regional sales and marketing activities to it. We are sure that with this step we will provide our customers with better and distinguished services.

Our new **Saudi Arabia** show room will open during the early months of 2017 and it is targeting the huge **Saudi Arabia** educational market with the growing demands of public and private schools.

Also **Egypt`s** sales and marketing office serving the African and Mediterranean markets will have a new look starting year 2107. The attached showroom is a unique turning point concept for the schooling market. (Please refer to the last page for information on our head office and branches.)

Production

Since We - **Edu-Fun** - have the first production seed in year 1991 in Egypt, we have expanded our production lines to cope with the expanding demand of our products and provide wide collection of Edu Fun range. New CNC machine centers and painting lines are added for quality and speed development.

We are able to develop new product range by the execution of OEM products with our two factories and four production lines (solid wood, panel board, tube bending, wooden toys and puzzle).

Factory 1991

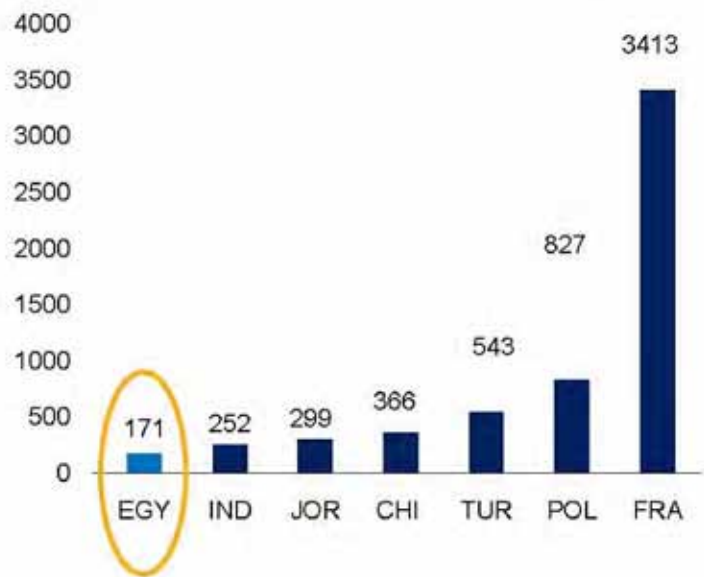

Lower price... Best quality

Edu-fun keeps expanding its production facilities in **Egypt** in order to balance the fast development and changing of world economy with the devaluation of the Egyptian pound during year 2016. As labor intensive products, Edu fun factories become very competitive with its high labor cost and in the same time one of the cheapest in the world.

Shocking to know is that the price of year 2017 is almost **%50 less**; it is competitive in a challenging way to find that quality with great specification in such low price.

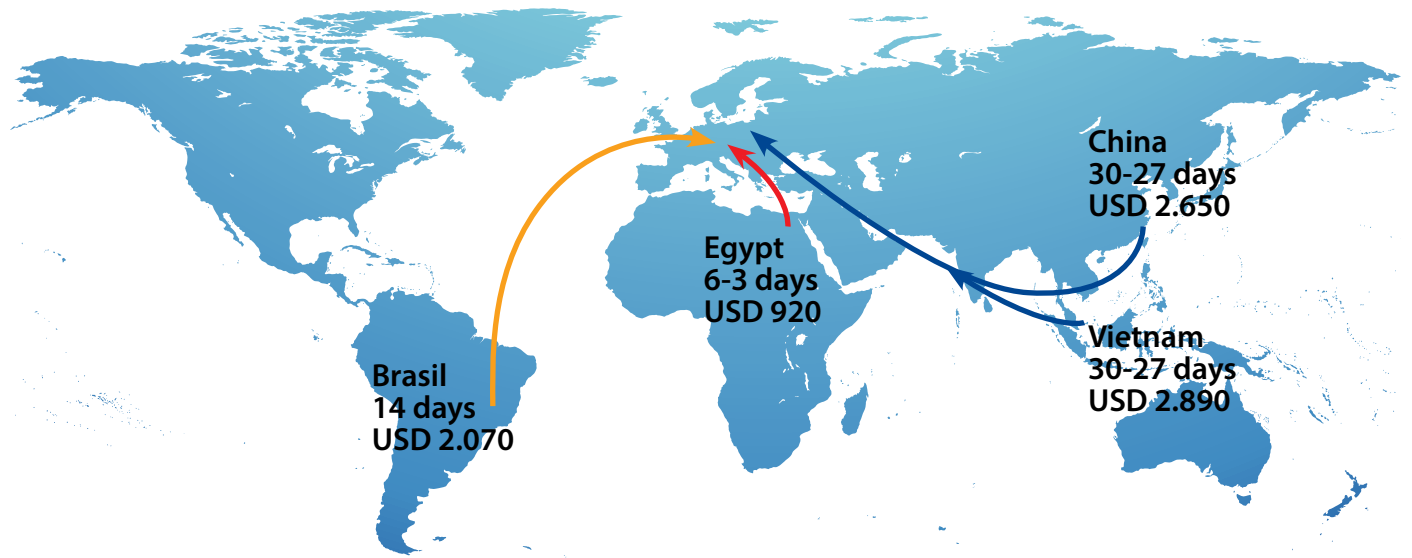

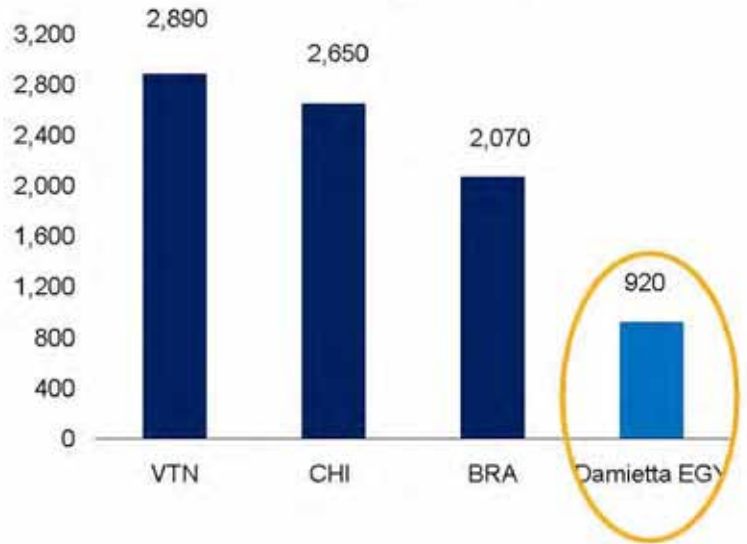

Annual Employee Wages |2010/2011 USD

Unique location

Egypt's unique location and the advantage of being near to Europe with shipping time of **7 days maximum** and flying time of **4 hours maximum** gives **Edu-fun** factories in **Egypt** the privilege over their opponents at east Asia and China factories. This can save lots of time, money and create new opportunities.

Transportation Cost of 20 ft container to Europe in USD 2010

European material & standards

Edu-fun was the first factory in the world to import European materials such as (beech wood, plywood, paints) then process, manufacture and send them back to the European market and the case remains as it is. On the other hand, other countries using local cheaper options.

All of our products and production facilities are certified with international and Europe standers.

EN 71

ISO 9001
ISO 14001
OHSAS 18001

CE Edu-fun is a brand that guarantees compliance with the CE toys safety standards.

Wood is a natural bio degradable material that is most suitable material for children from the first months. All our products are designed and manufactured from the highest wood material from plantations for sustainable use. We also use non-toxic paints and lacquers.

Product is manufactured by European Materials.

New products

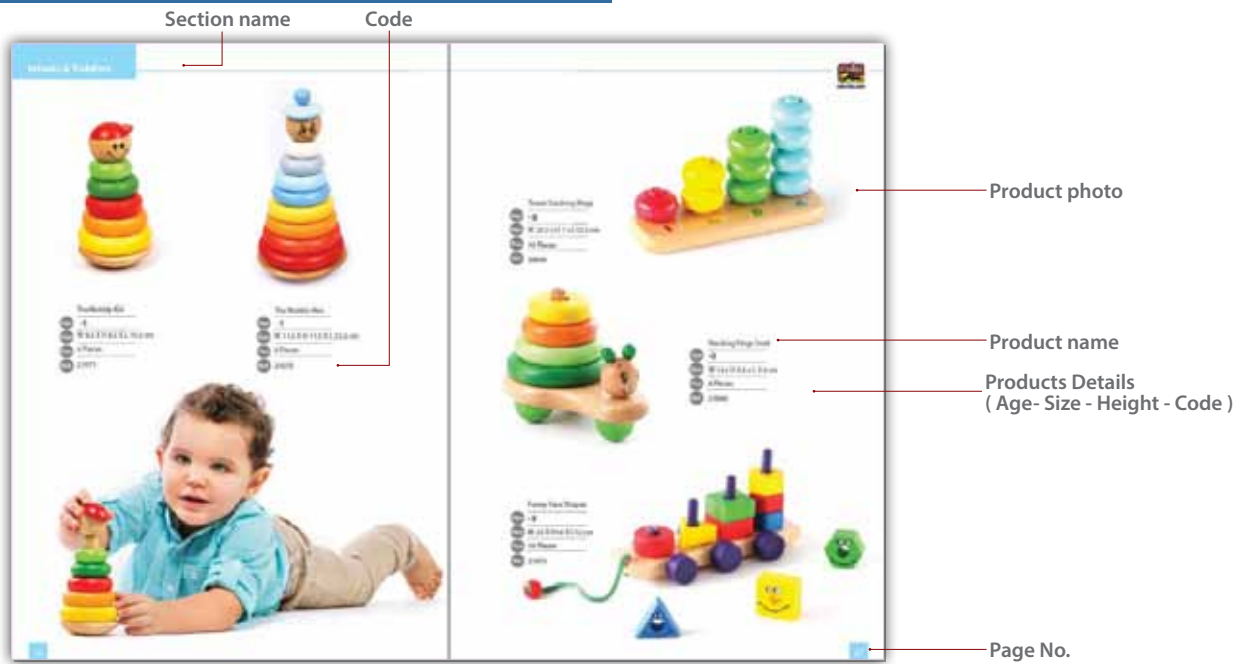

We are proud to introduce 200 new products to our exiting range in 2017.

As a result of the smooth collaboration of international designers and our professional in house designers and engineers, we have new ranges in furniture and wooden toys, and finally our new Montessori collection.

Edu-fun, In the Celebration of 25 years of existence in the international market, thanks her current and new clients and promises to continue developing and improving to remain as it is as, the top manufacturer in the region.

Infants & Toddlers

From the very beginning of life, children's curiosity is insatiable. They want to see, touch, taste and explore everything around them. What better than providing them with the tools to guide them in a safe, enjoyable way. We at Edu-Fun have the educational toys that are suitable to keep even the busiest of minds and hands satisfied as they explore their world.

Educational Toys

The early Pre-school years before formal education are the most formative for children. Their little minds are wide open and ready to accept any knowledge and information that they are subjected to. Edu-Fun believes that enhancing and advancing children's development during these crucial years is essential to build up strong foundation for a life-time of learning success. Edu-Fun has designed products for both pre-school and older children to help them explore and discover their world.

Dramatic Play

Step into the world of a child's imagination, playing house, going shopping, having a tea party for a favorite teddy or playing doctor for an injured doll. Children have a very clear sense of imagination and dramatic play tools enhance this sense at the same time breaking down walls of shyness as they role-play different characters. Whatever the game of pretend they've conjured up we have the toys, kits, puppets and scaled down models which help their imagination to come alive.
