Montessori Line

“Within the child lies the faith of the future” Maria Montessori

We would like to introduce our first collection of Montessori products for year 2017. This step was not fortuitous; but was the outcome of our belief in education. We see education as the only way for a brighter future. Therefore we haven't limited our job in manufacturing innovative high quality educational toys and furniture, but we went a farther step and contributed in the society by establishing schools all over the county.

Seeking the best we choose The Montessori Method and established the first and only Montessori school in Egypt. The main concept of Montessori is to promote the joy of learning. This joy of learning develops a well-adjusted person who has a purpose and direction in their life. Children, who experience the joy of learning, are happy, confident, fulfilled children.

Dr. Maria Montessori is without any doubt one of the greatest names in education. Her ideas have been an inspiration for people working in pre-school and primary education. Therefore it will always be a great honor for us that she was influenced by Egypt antiques and used the pyramid in the Grammar symbols.

In 1981, Mrs. Marguerite Richardt, who studied under a trainee of Dr. Maria Montessori herself, came to Egypt and opened the first Montessori preschool. She also taught and inspired generations of adults by offering the Montessori diploma for early childhood over the years. Mrs. Marguerite has been our guide through our trip in school and manufacturing Montessori teaching materials. We worked together to establish the right Montessori method in Egypt.

The leap

Edu-Fun celebrated the opening of its showrooms and offices In September 2016 in **Dubai, UAE**. All international and regional export offices, sales and marketing together with our head offices will be moved to the new location with the beginning of year 2017.

Edu-Fun group is restructuring its activities to keep pace with the growing markets to become a leading regional and an international player.

Dubai as an international business and logistics hub was our perfect choice to move our head quarter, international & regional sales and marketing activities to it. We are sure that with this step we will provide our customers with better and distinguished services.

Our new **Saudi Arabia** show room will open during the early months of 2017 and it is targeting the huge **Saudi Arabia** educational market with the growing demands of public and private schools.

Also **Egypt`s** sales and marketing office serving the African and Mediterranean markets will have a new look starting year 2107. The attached showroom is a unique turning point concept for the schooling market. (Please refer to the last page for information on our head office and branches.)

Production

Since We - **Edu-Fun** - have the first production seed in year 1991 in Egypt, we have expanded our production lines to cope with the expanding demand of our products and provide wide collection of Edu Fun range. New CNC machine centers and painting lines are added for quality and speed development.

We are able to develop new product range by the execution of OEM products with our two factories and four production lines (solid wood, panel board, tube bending, wooden toys and puzzle).

Factory 1991

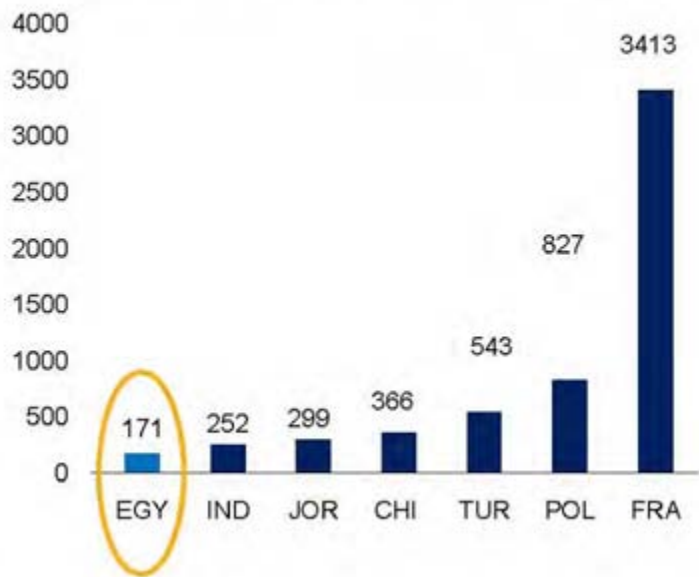

Lower price... Best quality

Edu-fun keeps expanding its production facilities in *Egypt* in order to balance the fast development and changing of world economy with the devaluation of the Egyptian pound during year 2016. As labor intensive products, Edu fun factories become very competitive with its high labor cost and in the same time one of the cheapest in the world.

Shocking to know is that the price of year 2017 is almost **%50 less**; it is competitive in a challenging way to find that quality with great specification in such low price.

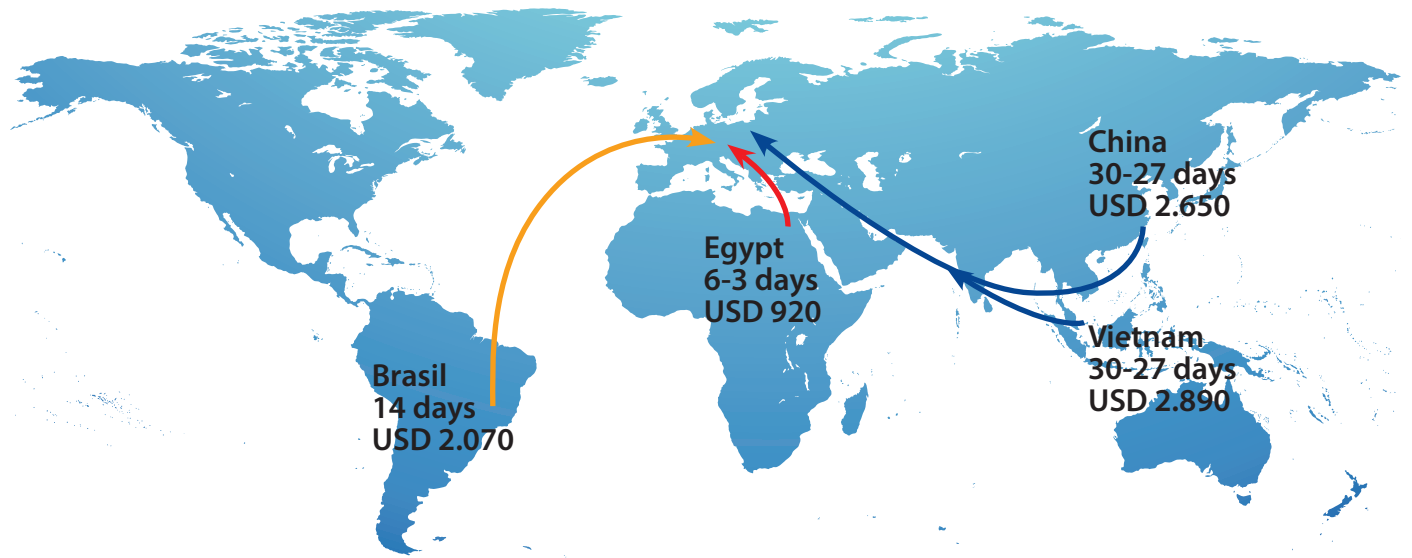

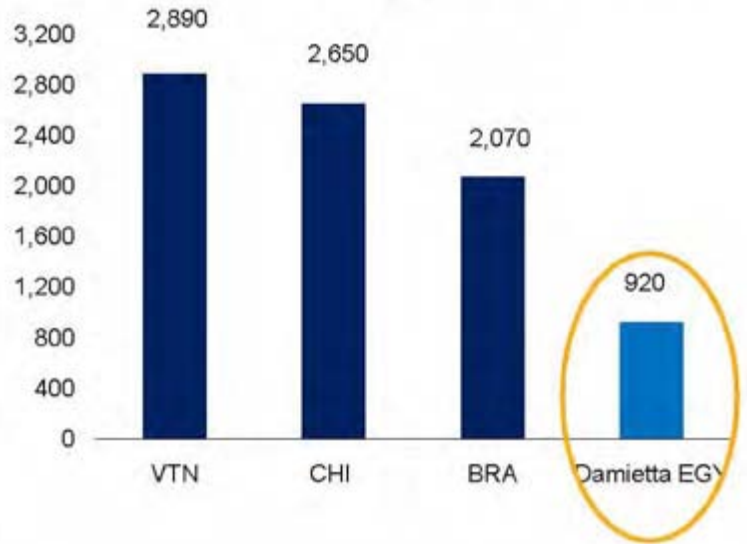

Annual Employee Wages |2010/2011 USD

Unique location

Egypt's unique location and the advantage of being near to Europe with shipping time of **7 days maximum** and flying time of **4 hours maximum** gives **Edu-fun** factories in **Egypt** the privilege over their opponents at east Asia and China factories. This can save lots of time, money and create new opportunities.

Transportation Cost of 20 ft container to Europe in USD 2010

European material & standards

Edu-fun was the first factory in the world to import European materials such as (beech wood, plywood, paints) then process, manufacture and send them back to the European market and the case remains as it is. On the other hand, other countries using local cheaper options.

All of our products and production facilities are certified with international and Europe standers.

New products

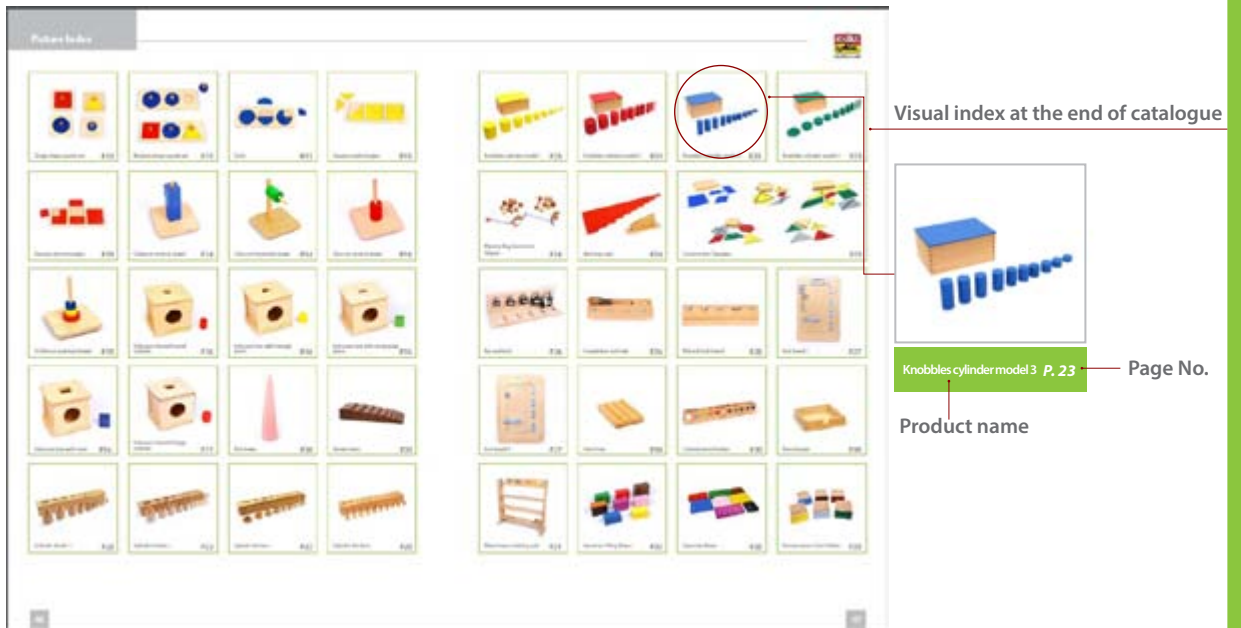

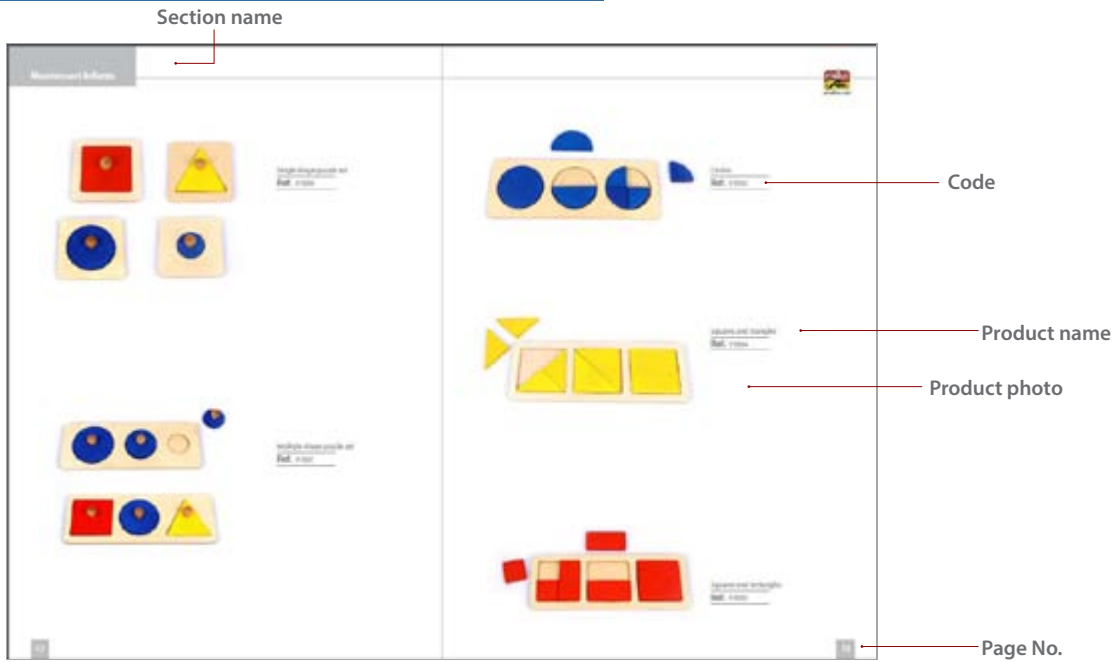

We are proud to introduce 100 new products to our exiting range in 2017.

As a result of the smooth collaboration of international designers and our professional in house designers and engineers, we have new ranges in furniture and wooden toys, and finally our new Montessori collection.

Edu-fun, In the Celebration of 50 years of existence in the international market, thanks her current and new clients and promises to continue developing and improving to remain as it is as, the top manufacturer in the region.

Montessori Infants

« He does it with his hands, by experience, first in play and then through work. The hands are the instruments of man's intelligence »
Maria Montessori, The Absorbent Mind.

Children at this age have an absorbent mind. Therefore, we must make the environment, surrounding them, as interesting and attractive as we can. All the Montessori infants and toddler materials stimulate children's senses and help them absorb, concentrate and master the new knowledge learned.

Montessori Sensorial

“The mind has formed itself by a special exercise of attention, observing, comparing and classifying.” *Maria Montessori, 1922*

The sensorial materials are designed to draw the child’s attention to one single property, stimulating the development of the senses and muscle coordination. It is also self-corrected; therefore the child can work completely independently. Through sensorial materials the child learns the foundation of important concepts.

Montessori Language

“Children are able to absorb language from their environment and easily learn how to speak, read and write if language in its various forms is present in their environment during the period of the Absorbent Mind” *Maria Montessori, The Absorbent Mind.*

Montessori language materials allow children to discover and explore the language properties. Accordingly they learn to read and write in the simplest way.

Montessori Mathematics

“The child’s mind is not prepared for number ‘by certain preliminary ideas’ given in haste by the teacher, but has been prepared for it by a process of information, by a slow building up of itself” *Maria Montessori, 1914*

Although the Montessori mathematical materials look simple but they are very effective. By working with them children can identify mathematical relations and laws and discover for themselves the rules governing them.
