

2018 Montessori Materials & Furniture

Montessori Line

“Within the child lies the faith of the future” Maria Montessori

We would like to introduce our first collection of Montessori products for year 2017. This step was not fortuitous; but was the outcome of our belief in education. We see education as the only way for a brighter future. Therefore we haven't limited our job in manufacturing innovative high quality educational toys and furniture, but we went a farther step and contributed in the society by establishing schools all over the county.

Seeking the best we choose The Montessori Method and established the first and only Montessori school in Egypt. The main concept of Montessori is to promote the joy of learning. This joy of learning develops a well-adjusted person who has a purpose and direction in their life. Children, who experience the joy of learning, are happy, confident, fulfilled children.

Dr. Maria Montessori is without any doubt one of the greatest names in education. Her ideas have been an inspiration for people working in pre-school and primary education. Therefore it will always be a great honour for us that she was influenced by Egypt antiques and used the pyramid in the Grammar symbols.

In 1981, Mrs. Marguerite Richardt, who studied under a trainee of Dr. Maria Montessori herself, came to Egypt and opened the first Montessori preschool. She also taught and inspired generations of adults by offering the Montessori diploma for early childhood over the years. Mrs. Marguerite has been our guide through our trip in school and manufacturing Montessori teaching materials. We worked together to establish the right Montessori method in Egypt.

We have added this year to Montessori material catalogue, our collocation of natural furniture, which complies with Montessori philosophy. A wide range of chairs, tables, storage units and material units. All of our products are made of the finest natural wood that endures years of use.

We Came Closer

We at Edu fun® strive hard for better sales and export services of our products and high customer support. This year we proudly announced the opening of our European subsidiary to serve this important market.

Edu fun® GmbH Germany

For more than 25 years, Edu fun® has proudly facilitated the educational market in Europe. After many years, we decided that we should be physically located in Europe. We have chosen to start with Germany to be the headquarters for our new branches in Europe.

Germany is one of the leading countries in both Europe and worldwide in the design and development of learning resources and educational furniture. With its central location in Europe, Germany will be a unique hub to service the sales operations and customer support. Europe is our main market following the Middle East. We have a long strategic plan for the market in Europe. Edu fun® GmbH is just our first step.

Edu fun® PTY, LTD, Australia

Edu fun® products have been sold in Australia since 1995. In the beginning, the products were sold by the main learning resource distributors in Australia.

In 2015, we opened our branch, **Edu fun®, PTY, LTD.**

Edu fun® recognized the importance to establish itself in Australia. It has always aimed to satisfy its clients making sure each customer feels they are **Edu fun®** favourite client.

Edu fun® Middle East Dubai, UAE

Edu fun® group is streamlining its activities to keep pace with the growing markets and is becoming a leader in the region and as an international player.

As a place to do business, and as a hub for the region and beyond, the United Arab Emirates (UAE) continues to be increasingly important, relevant and attractive to businesses from around the world. For these reasons, **Edu fun®** has moved its head office to UAE. We continue to care about our market in GCC in general and in the UAE in particular due to its importance and its approximate location to our production facilities in Egypt.

With more than 40% of the population younger than 30, GCC countries are an important market for learning resources & educational furniture. They are notably growing in the fields offering great educational facilities.

Edu fun® MENA Egypt

Egypt's economic conditions have started to improve considerably, after a period of stagnation. This is a result of improved liberal economic policies by the government, increased revenues from tourism along with a booming stock market.

According to annual reports by some international organizations, Egypt has been rated and recognized as one of the top countries concerned with reforming the market standards for pre-school educational services.

Moreover it has educated the market with world standards and codes to set the Egyptian standards and codes later.

Taking advantage of its large population of 104 million and a birth growth rate of 2.3%, Egypt is the biggest market in the MENA region.

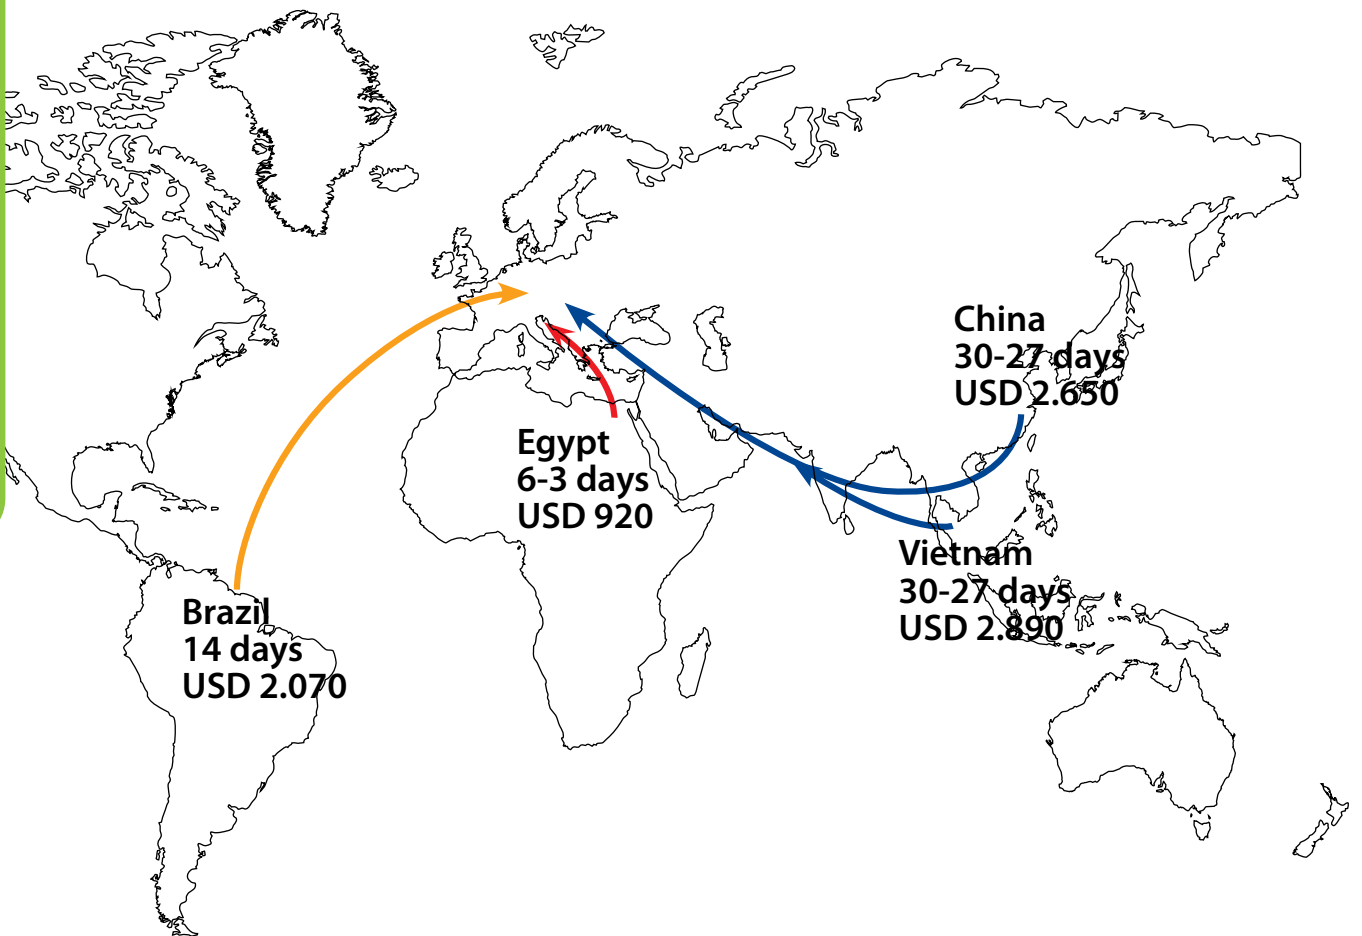

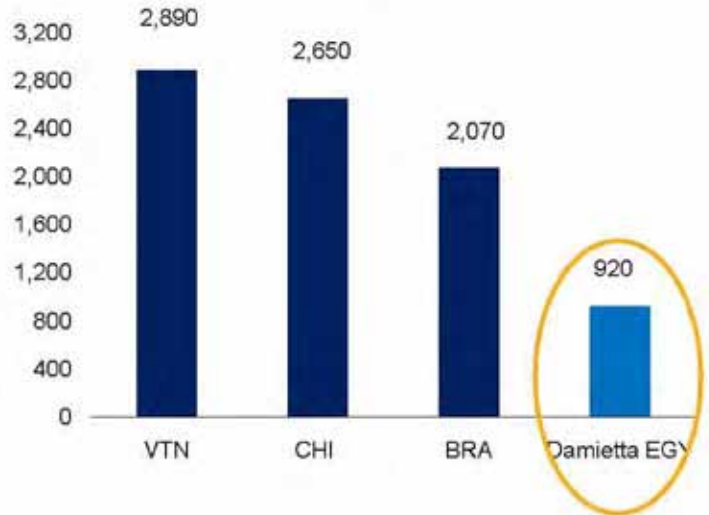

Edu fun® MENA with its headquarters in Egypt is the oldest and largest subsidiary in the Middle East and Africa.

Unique Location

Egypt's unique and advantageous location near Europe (a shipping time of 7 days maximum and flying time of 4 hours maximum) gives its' production facilities in Egypt a privilege over their opponents in East Asia and China. This can save lots of time, money creating new opportunities.

Transportation Cost of 20 ft container to Europe in USD 2010

Euro One

Euro ONE also known as a «movement certificate», enables importers in certain countries to import goods at a reduced or nil rate of import duty under trade agreements between the EU and beneficiary countries. Signed in 2001 it allows Edu fun® products to be shipped from Egypt to Europe. This is another save in costs.

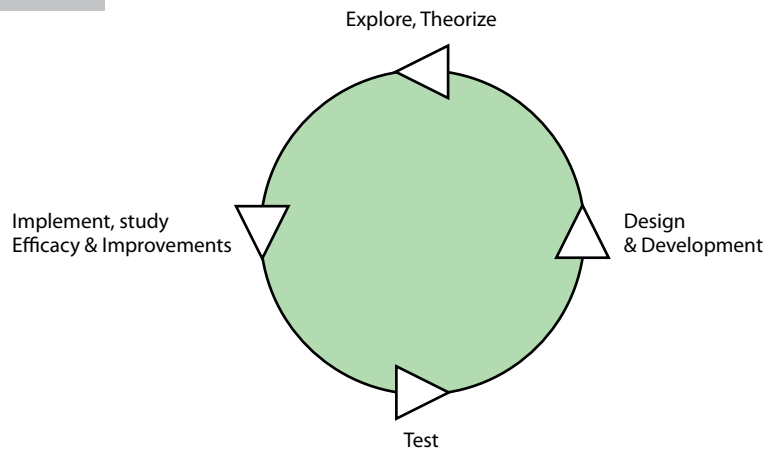

Business Delegations & Factory Visits

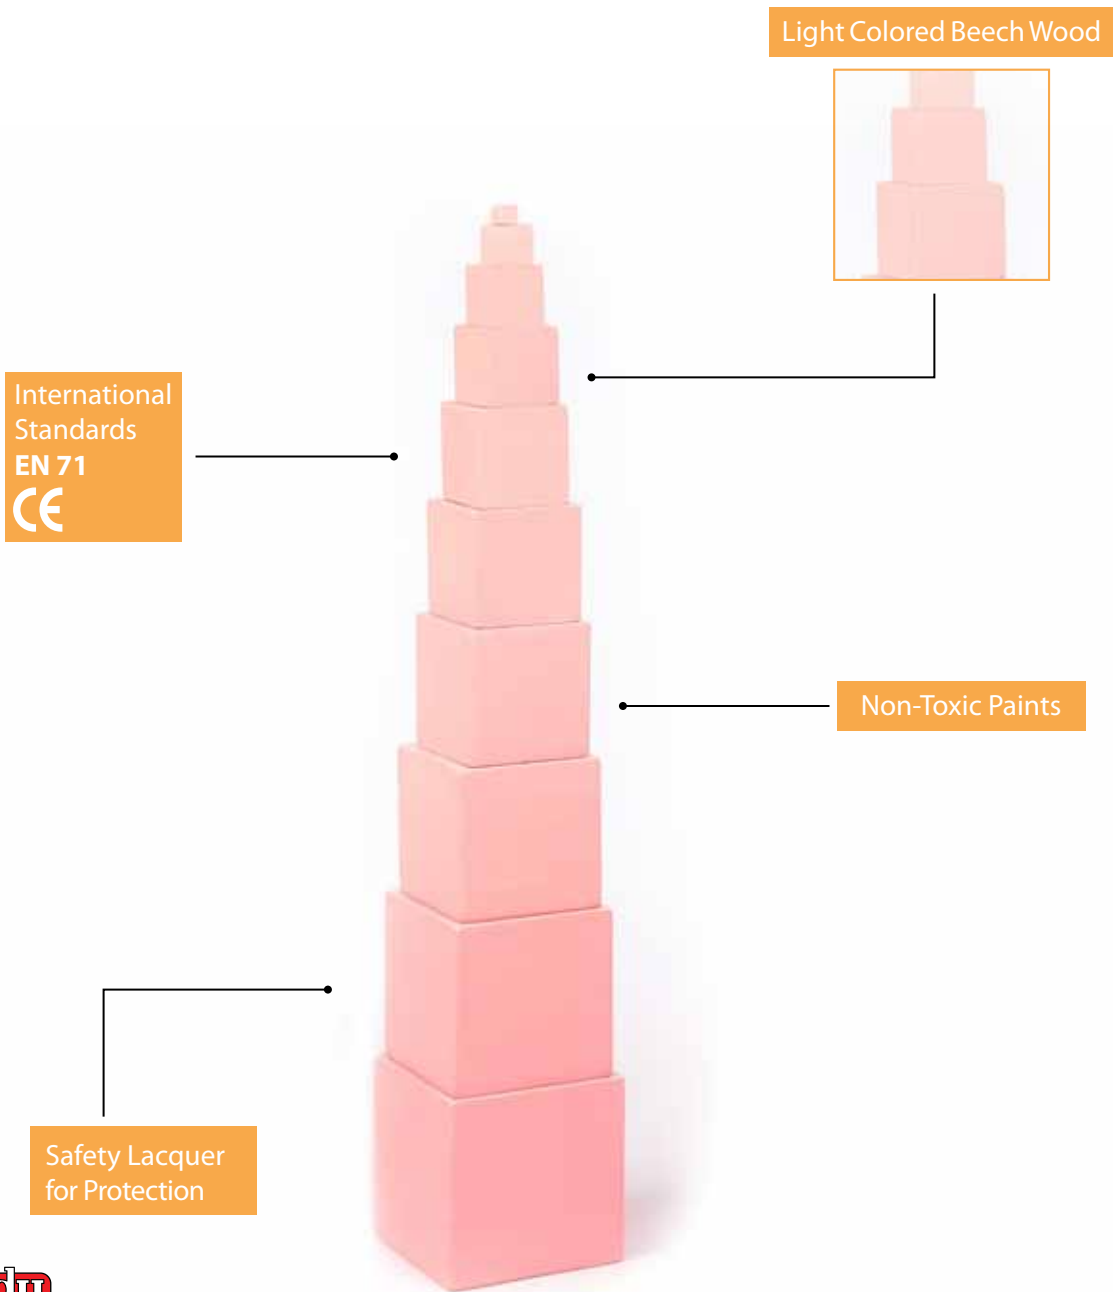

Introduction

We Design ...

Since its founding in 1987, the R&D Department has served in the design and improvement of **Edu fun**® Products. The R&D Department leads the company and secures the vision and development of the product, market, and the company's identity. Company R&D collaborates with experts from All over the world to research, develop and demonstrate innovative products or services. Our R&D Department collaborates with our industrial arms to develop and demonstrate innovative concepts.

R&D PLC (Project Life Cycle)

We Produce

Since we, **Edu fun®** planted the first production seed in Egypt in 1998, we have expanded our production lines to manage the expanding demand of our products and provide wide collection of **Edu fun®** range.

New state of the art machines have been added to our production lines offering quality and on-time development. We are able to develop new product range by the execution of OME products with our factories and our four production lines (solid wood, panel board, tube bending, wooden toys and puzzle).

European material

In the educational furniture & materials sector, **Edu fun**® is a pioneer in developing the concept of importing high quality natural European materials, manufacturing complete products outside Europe, and send back to European market.

Taking advantage of cheap labor in Egypt, we achieved the hard equation:
European materials & quality products / competitive price.

As the most intimate friends of children, toys are of vital importance to the intellectual development and health of children. They are indispensable consumer products during the child's growth.

However, there are some hazards that may bring harm to children and even threaten their health. In view of the particularity of behaviour of children and their development, countries and regions have imposed more stringent requirements for the quality and safety of toys and children's products.

Quick Shipping of European raw materials

Introduction

European standards

Edu fun® commitments to the children has no limits that is why we always care to meet the world's latest standards of safety for our products range. We in **Edu fun**®, care to comply with the international standards especially strict European CE standards. This is to guarantee we offer safe and healthy products to the pre-school kids of the world.

All our products and production facilities are certified with the international and European standards.

Montessori Infants

“He does it with his hands, by experience, first in play and then through work. The hands are the instruments of man’s intelligence.” Maria Montessori, *The Absorbent Mind*.

Children at this age have an absorbent mind. Therefore, we must make the surrounding environment, as interesting and attractive as we can. Montessori infants and toddler materials stimulate the senses allowing the child to absorb, concentrate and master the new knowledge learned.

Montessori Sensorial

"The mind has formed itself by a special exercise of attention, observing, comparing and classifying."
Maria Montessori, 1922

The sensorial materials are designed to draw the child's attention to one single property, stimulating the development of the senses and muscle coordination. It is also self-corrected, therefore the child can work completely independently. Through sensorial materials the child learns the foundation of important concepts.

Montessori Language

“Children are able to absorb language from their environment and easily learn how to speak, read and write if language in its various forms is present in their environment during the period of the Absorbent Mind” Maria Montessori, The Absorbent Mind.

Montessori language materials allow children to discover and explore the language properties. Accordingly they learn to read and write in the simplest way.

Montessori Mathematics

“The child’s mind is not prepared for number ‘by certain preliminary ideas’ given in haste by the teacher, but has been prepared for it by a process of information, by a slow building up of itself” Maria Montessori, 1914

Although the Montessori mathematical materials look simple but they are very effective. By working with them children can identify mathematical relations and laws and discover for themselves the rules governing them.

Flexo Tables

Natural Line

These creative flexible movable tables combine contemporary looks, functionality as well as flexibility. This encourages good social behaviour, creativity and cooperation among students. The tables come in a variety of unique shapes and sizes. Each shape and size has its merits and benefits, depending on the learning condition. Tables can be combined with each other or with other tables combining a multitude of layouts creating an attractive look. They are manufactured from medium-density fiberboard (MDF) covered by high-pressure laminate (HPL), with ABS edge banding. The table legs may be fixed or adjusted to offer different heights making it an advantage for mixed age groups.
